

HOSSAM IBRAHIM

Front-End Developer | React.js | Angular | JavaScript / TypeScript
Cairo, Egypt | +20 01003076053 | hossamibrahim.fcrai23@gmail.com
github.com/Hossamfcrai | linkedin.com/in/hossam-ibrahim-b98a7624a

PROFESSIONAL SUMMARY

Front-End Developer with a strong foundation in building scalable, modern, and highly responsive web applications. Core technical expertise includes JavaScript (ES6+), TypeScript, React.js, Angular, and Vue.js, complemented by modern styling frameworks like Tailwind CSS and component libraries. Experienced in managing complex application state, implementing robust form validation, and delivering seamless user interfaces.

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks & Libraries: React.js (Hooks, Context API), Angular, Vue.js, Node.js, Express.js
Styling: TailwindCSS, Mantine UI, Bootstrap 5, Responsive Design, Mobile-First UI
Databases: MongoDB, MongoDB Compass, RESTful API Design
Build & Tooling: Git, GitHub, npm, VS Code
Forms & Validation: React Hook Form, Zod Schema Validation, Mantine Form
Routing & HTTP: React Router v6, Axios, REST API Integration
State Management: useReducer + useContext, Redux
Concepts: Component-Based Architecture, Decoupled / Multi-Repo Architecture, Single-Page Applications (SPA), Cross-Browser Compatibility, Agile, Scrum

WORK EXPERIENCE

Front-End Developer | Selah El Telmeez (EdTech Platform) — Freelance 08/2024 – 03/2025

- Developed 100+ educational content pages for a live EdTech platform serving K-12 students across multiple subjects and educational stages.
- Adapted existing HTML5 / CSS3 / Vue.js templates to new lesson content, maintaining strict visual consistency and cross-browser compatibility across the entire platform.

Technologies: HTML5, CSS3, Vue.js

PROJECTS

Hungry Spot — Restaurant Ordering Platform (Team Project)

React (useReducer, useContext) | React Router DOM | Axios | React Hook Form + Zod | Recharts | Framer Motion | Lucide | SweetAlert2 | Tailwind CSS | Vite

Live: hungry-spot.vercel.app | Repo: github.com/Hossamfcrai/Hungry_Spot

- Built a restaurant ordering platform where users browse dishes by category, place orders, and track live order status through a personal receipt.
- Admins get a protected dashboard to manage users, menu items, and orders, plus an analytics page (revenue, orders, items, users) built with Recharts.
- Owned the core architecture, the guest / user / admin authorization flow with protected routes, the Login and Sign Up pages (React Hook Form + Zod validation), and the restaurant page for browsing dishes, ordering, and viewing receipts.
- Designed the state management layer with useReducer and useContext: separate reducers for auth, menu, orders, and users, exposed through context providers and custom action hooks for clean, predictable data flow.
- Created a dedicated Axios services layer (auth, menu, orders, users) to decouple data fetching from UI components.

ArtHouse — Graduation Project of NTI | Angular | Node.js | Express.js | MongoDB | REST API

github.com/Hossamfcrai/artHouse_portfolio | github.com/Hossamfcrai/ArtHouse_admin |

github.com/Hossamfcrai/artHouse_Backend

- Architected and built a comprehensive full-stack web application for artists to showcase and manage their work, structured as three decoupled repositories for scalability and clean separation of concerns.
- Repo 1 — Artist Portfolio Frontend:** Designed and developed the public-facing portfolio in Angular, allowing artists to display galleries, bio, and contact information with a responsive, mobile-first UI.
- Repo 2 — Admin Dashboard:** Built a full administrative suite in Angular enabling content management, media uploads, and inquiry handling — giving non-technical users complete control over the platform.
- Repo 3 — Backend API:** Developed a RESTful API with Node.js and Express.js backed by MongoDB, handling authentication, media management, and all data operations across both frontends.

- Applied decoupled multi-repo architecture to ensure each layer could be deployed, scaled, and maintained independently.

Local Business Hub — College Graduation Project | *React 18* | *TypeScript* | *Mantine UI* | *TailwindCSS* | *Leaflet* | *Zod* | *Axios*

github.com/Hossamfcai/local-business-frontend

- Full-featured marketplace platform connecting local startup businesses with customers — built collaboratively with a frontend team as a college graduation project.
- Owned and delivered the complete Business Owner Dashboard: registration flow, business profile management, product/service listing (add, edit, delete), and interactive map integration for pinning business location using Leaflet and React-Leaflet.
- Implemented type-safe forms with Mantine Form and Zod schema validation; built responsive, mobile-first layouts with Mantine UI v7 and TailwindCSS.
- Used Axios for REST API integration, React Router v6 for client-side routing, and SweetAlert2 + Mantine Notifications for user feedback.
- Codebase: TypeScript 98.7% — strict type safety enforced across all components.

TRAINING & CERTIFICATIONS

MEAN Stack Web Development — Intensive Programme | National Telecommunication Institute (NTI)

07/2024 – 09/2024

- Hands-on training in Angular, TypeScript, RESTful API integration, Express.js, Node.js, and MongoDB.
- Graduation project: ArtHouse — full-stack artist portfolio platform (Angular, Node.js, MongoDB).

EDUCATION

Bachelor of Computing and Artificial Intelligence | Helwan University — Grade: Very Good

Graduated: 2024

- Relevant coursework: Data Structures, Algorithms, Object-Oriented Programming (OOP), Database Systems, Web Development, Software Engineering, Artificial Intelligence.

LANGUAGES

Arabic: Native **English:** Intermediate reading (B1) | Basic spoken & written (B1) | Actively improving

Military status

Status: is completed **Date:** 15/04/2025 – 01/06/2026
